Text Responses

Activities/ materials found most valuable

I really enjoyed the padlet and being able to see thoughts and ideas from other perspectives.

Really all of the materials included in this class were valuable for my learning. Some of the readings were challenging but it was SO good to glean the information from these sources and to also have the videos and films. So much more impactful than only using a textbook.

I found the films to be the best for my learned because I was able to see what was going on and therefor have a better understanding.

I found most valuable the trump effect

We learned so much useful information!

The paddle discussion site

Efforts to learn

This was fully remote which unfortunately isn't so great for me.

I tried my hardest.

N/A

I tried very hard.

Additional comments

Professor Roman is Great! has been always willing to clarify assignment and offer support.

It was well organized and easy to follow. The information was engaging. Thank you!

Suggestions for instructor

No suggestions. Professor Romano was involved in the class throughout the semester. The varied readings, videos, and films made the subject of climate justice come alive for her students.

None

She was great!

It was a lot materials, maybe put a little less.
